

Press Release - Construction. New Digital Sector

Fraunhofer Italia, as a partner in the H2020 ACCEPT project – „Assistant for quality Check during Construction Execution Processes for energy-efficient buildings”, is participating at the workshop “Construction. New digital Sector” which will be held on October 13th-14th 2016 in Malaga, Spain.

The aim of this event is to bring together actors from the construction, ICT, research, and student communities, as well as other interested bodies, in order to discuss various aspects of Digital Construction and the Energy Performance Gap, and to share and disseminate the most up to date findings from ACCEPT.

During the first day of the workshop, Fraunhofer Italia will present together with the other project partners new technologies that will deeply change the way of designing, building and managing our worksites. On the second day, Fraunhofer Italia will provide a specific session on Efficient Construction Processes through Lean Management. Other European initiatives will present their own projects and participants will have the chance to share their ideas during pitch-presentations too.

The participation to the workshop is free. You find the detailed programme as well as the registration form under the following link: <http://accept-project.com/workshop/>.
